

A ViewWatch™ secondary screen typically does not have a mouse or a keyboard, so it is convenient to disable the pop-up “balloon tips” displayed by Windows XP.

This document describes the procedures required to disable “balloon tips” in Windows XP.

Balloon tips can be disabled in Windows XP by editing the registry.

1. Start Regedt32.exe and locate the following registry key:

HKEY_CURRENT_USER\SOFTWARE\Microsoft\Windows\CurrentVersion\Explorer\Advanced

2. Create or modify the following value:

Name	Type	Data
EnableBalloonTips	REG_DWORD	0

NOTE: To re-enable balloon tips, change the data from 0 to 1.
