

Dual Head Logon Secondary Screen Does Not Display TCP Streams

This document describes a limitation in the use of the ViewWatch™ Dual Head logon option. Only multicast video streams can be displayed in the secondary screen.

ViewWatch™ can automatically open and manage a secondary screen by using the *DualHead=True* parameter; for example: **<http://server/ewatch/logon.asp?DualHead=True>**.

The secondary screen can only display multicast video streams. Unicast streams are currently not supported. If ViewWatch™ is displaying unicast streams, using either the *rlogon.asp* logon page or the *StreamType=TCP* URL parameter, then video will not be displayed in the secondary screen.
