

e-Watch®

DOM-124

e-Watch® Family of Cameras

Part of the e-Watch® Situational Awareness System

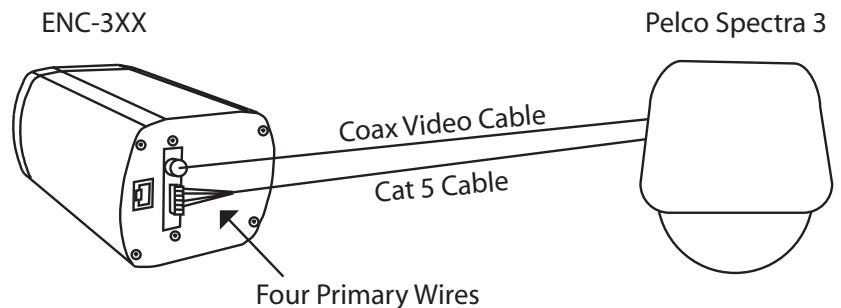

Survivability. Reliability. Flexibility. Processing power. Wireless. Multicast. Not terms you normally hear when discussing surveillance cameras. But with the e-Watch® family of tactical cameras, you get all of these and more.

Not the average surveillance camera

The e-Watch DOM-124 combines a Pelco Spectra III pendant camera (SD53CBWPG-E0) with an e-Watch ENC-3XX encoder. This combination gives the user the best of both worlds. The Spectra III has an integrated 23-power zoom lens that can be controlled by the user. There are two modes of operation – color standard mode to use during daytime lighting conditions (down to .08 lux) and monochrome high-sensitivity mode to use during low-light conditions (down to .013 lux – quarter moon light). This camera can also be used in total darkness with the addition of an infrared illuminator (available through third parties).

Room to grow

The e-Watch encoder, attached to the Pelco camera, is equipped with three expansion slots that allow users to enhance the functionality of the camera.
